Frequently Asked Questions

Can't find the answer to your question in the manual? You may find the answer to your question in the FAQs about the JBL Clip 5 below.

Does the JBL Clip 5 have a built-in microphone?

No, the JBL Clip 5 does not have a built-in microphone. This means users will not be able to use it for hands-free calling, but it may result in a clearer audio experience during music playback compared to speakers with built-in microphones.

What is the battery capacity of the JBL Clip 5?

The JBL Clip 5 has a battery capacity of 1400 mAh. This means users can enjoy up to 12 hours of playback time on a single charge, making it convenient for on-the-go use.

What is the RMS rated power of the JBL Clip 5?

The JBL Clip 5 has an RMS rated power of 7 W. This means it delivers a decent sound output for its compact size, making it a good choice for users looking for a portable speaker with good audio performance.

Does the JBL Clip 5 have FM radio or a card reader integrated?

No, the JBL Clip 5 does not have FM radio or a card reader integrated. This makes it a more streamlined and compact device, ideal for users who prioritize simplicity and portability in a

Does the JBL Clip 5 have a Bluetooth connectivity and a warranty card included in the package?

Yes, the JBL Clip 5 has Bluetooth connectivity and comes with a warranty card included in the package. This ensures users can easily connect their devices wirelessly and have peace of mind with the product's warranty coverage.

What is the weight of the JBL Clip 5?

The JBL Clip 5 has a weight of 285 g.

Can bluetooth devices of different brands be connected to each other?

Yes, bluetooth is a universal method that allows different devices equipped with bluetooth to connect to each other.

What is the height of the JBL Clip 5?

The JBL Clip 5 has a height of 134.5 mm.

What is the width of the JBL Clip 5?

The JBL Clip 5 has a width of 86.3 mm.

What is the depth of the JBL Clip 5?

The JBL Clip 5 has a depth of 46 mm.

What is bluetooth?

Bluetooth is a way of exchanging data wirelessly between electronic devices via radio waves. The distance between the two devices that exchange data can in most cases be no more than ten metres.

When is my volume too loud?

A volume above 80 decibels can be harmful to hearing. When the volume exceeds 120 decibels, direct damage can even occur. The chance of hearing damage depends on the listening frequency and duration.

Wat is Dolby Atmos?

Dolby Atmos is a technology that ensures that the sound is reflected from the ceiling to where you are listening. This makes it possible to create a 5.1 effect with only 1 speaker.

How long does it take to charge the battery of the JBL Clip 5?

It takes 3 h to charge the battery of the JBL Clip 5.

Is the manual of the JBL Clip 5 available in English?

Yes, the manual of the JBL Clip 5 is available in English .
